B.Tech Artificial Intelligence and Machine Learning student with a strong foundation in Python, Java, SQL, and Machine Learning. Experienced in developing academic and personal projects and completing technical internships. Seeking a software development internship to apply problem-solving skills and build practical backend solutions.

WORK EXPERIENCE

AICTE | EduSkills | AWS Academy Generative AI Virtual Intern

04/2026 - 06/2026
Virtual

- Completed an 8-week virtual internship focused on Generative AI.
- Explored Generative AI concepts and practical applications.
- Applied AI concepts through structured learning and hands-on activities.

AICTE | EduSkills | Zscaler AI-ML Virtual Internship

04/2025 - 06/2025
Virtual

- Completed a virtual internship focused on Zero Trust Cloud Security.
- Learned foundational concepts in Zero Trust and cloud security.
- Completed structured technical learning activities during the internship.

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning

JSPM University, Pune • GPA: 8.46/10

Wagholi, Pune, Maharashtra • 01/2024 - 01/2028

CERTIFICATIONS

Machine Learning using Python

Simplilearn SkillUp

Introduction to Applied Data Science with Python

Simplilearn SkillUp

AI Powered Application Development

ABC CAD & IT Trainings / Arisha Foundation

AI Tools & ChatGPT Workshop

Be10x

AWARDS & SCHOLARSHIPS

Selected for the Internal Round

Smart India Hackathon

01/2026

PROJECTS

Iris Flower Classification using Machine Learning

Developed a machine learning model to classify Iris flower species; compared classification algorithms and evaluated performance using accuracy. Achieved 100% accuracy with the selected Logistic Regression model. Technologies: Python, scikit-learn, Pandas, NumPy

Admission Management System

Developed an application to manage student admission records, including entering, storing, updating, and managing student information. Technologies: Python

AI Finance Tracker

Developed a finance tracker to record and analyze personal expenses, categorize spending, and support expense monitoring and budgeting. Technologies: Python, Pandas

Food Delivery Application

Developed a console-based food delivery application with menu selection, order processing, billing, GST, service and delivery charges, payment handling, and receipt generation. Technologies: Python

SKILLS

Technical: C++, Data Structures & Algorithms, Git, GitHub, Java, Machine Learning, Python, SQL

Soft: Adaptability, Communication, Problem Solving, Teamwork, Time Management

Languages: English, Hindi, Marathi
